

## **A Vision for Preschool Education at College Community Schools**

The College Community School District supports quality preschool programming that:

- encourages strong community and family partnerships to provide, support and sustain quality services to all young children
- emphasizes quality in staff, instruction, curriculum, and assessment
- prioritizes services to the children who need it the most: children raised in poverty and children with special needs
- prioritizes allocation of resources so that four-year-olds are served first, then three-year-olds, etc.
- provides wrap around services when necessary to allow participation
- aligns with the K-12 curriculum to support school readiness among all children
- minimizes or eliminates transitions for young children whenever possible
- holds the K-12 program harmless when resources are allocated
