

School Board Building Visits

Purpose Statement

The Board of Directors is committed to a learning environment where each student is challenged to develop to their full potential and become a productive citizen in our democratic society.

That end is best served when the district is directed by written Board policies—supported by administrative regulations—that reflect a realistic view of both what the school is and what it can be. For that reason, the Board of Directors is committed to visiting each school building every year.

As members of the College Community School Board, we visit schools to:

- Observe learning first-hand
- Show our support and appreciation for dedicated staff
- Increase visibility and accessibility
- Dialogue about student achievement and professional development
- Support and encourage teamwork
- Identify impact of Board decisions and policies
