

SENIOR SPOTLIGHT

Through WLC, I interned with Physician Assistants and Diagnostic Cardiology at St. Luke's Hospital. I was able to experience behind the scenes in the medical field and gain a stronger understanding of what the jobs entail by observing and communicating with the outstanding nurses, doctors and technicians. I was fascinated by both internships but decided Physician Assistant was the right fit for me. I loved the idea that as a Physician Assistant there is more flexibility regarding the specialty you want to work in as well as being able to assist in surgeries.

This fall I will study Neuroscience on the Pre-PA path at Coe College!
