

# SENIOR SPOTLIGHT

My favorite thing about my internship was working with a lot of strong women. Helping plan the Introduce a Girl to Engineering Day was a lot of work, but it paid off when I got to see the success at every site. I loved being able to communicate with people from different countries and around the US.

I created a lot of amazing connections with people at Collins.

Although I thoroughly enjoyed my internship experience and learned valuable lessons, I am still going into college as undecided because I want to explore all of my options at The University of Iowa.
