

# SENIOR SPOTLIGHT

“

My favorite thing about my internship was getting hands-on experience and seeing what the day-to-day job of a nurse was like. My internship benefited me greatly, mostly because of the wonderful advice I received from all the great nurses I worked with!

It solidified my plans that I wanted to be in the medical field, however, it showed me that nursing was not the best fit for me.

In the fall, I plan to attend the University of Iowa to study Human Physiology on a Pre-Dental track to be an Orthodontist!
